APPLICATION:

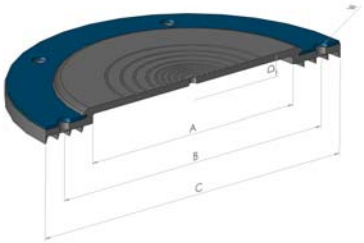
FLAT Pipetite is the latest in sealing technology for use in wall and ceiling penetrations.
Pipetite can seal a connection while allowing for significant movement of the pipe. Pre-drilled holes make installation simple, and a large range of sizes are available.

WORKING PRINCIPLE:

FLAT Pipetite's base incorporates self-sealing lips that provide flexibility and eliminate the need to "pack" the product off the wall. Silicone is not required during installation. Pipetite can be adapted to fit most pipe or tube diameters and allows the pipe to move significantly without causing damage or breaking the seal between the wall and the pipe.

STANDARD DESIGN:

- Available in five sizes to suit 0 – 135mm tube or pipe.
- Hygienic white silicon (FDA certified)
- 316 stainless steel polished support ring.
- Total self-sealing - no sealant required.
- Seal is flexible to accommodate movement.
- No cracking of silicon.
- 260°C temperature rating.
- No clean-up after installation.
- Materials compatible with cleaning solution.
- Predrilled for quick and easy installation.



Dimensions
