Series miniZoom

## VETRO

Circular sightglass, DN 150, PN 0, with glass disc in sodium silicate to DIN 8902 and wiper of the series W , wiper blade in silicone

Circular sightglass similar to DIN 28120, DN 150, PN 2,5 , with glass disc in sodium silicate to DIN 8902

> Circular sightglasses for welding into or onto vessel walls, in version PN 0 / PN 2,5 with a viewing diameter equal to DIN 28120

## Application:

The circular sightglass fittings are used for the observation and illumination of the inside of unpressurised vessels, silos, tanks etc. or such of a nominal pressure (PN) of 2,5 bar.
They represent, especially for large nominal diameters, a cost-saving alternative to the sightglasses of the pressure rates 6, 10 and 16 bar.

Viewing diameter:
80-225 mm
Operating conditions:

| Pressure: | No pressure (PN 0) resp. PN 2,5 |
| :---: | :---: |
| Temperatures: | Max. $150^{\circ} \mathrm{C}$ with glass disc in sodium silicate to DIN 8902 |
|  | Max. $280{ }^{\circ} \mathrm{C}$ with glass disc in borosilicate to DIN 7080 |
| Materials: |  |
| Base flange: | 1.4571 (AISI 316 Ti) (standard PN 0) / 1.4404 (AISI 316 L) (standard PN 2,5) |
|  | 1.4541 (AISI 321), RSt 37-2, H II or other materials on demand |
| Cover flange: | 1.4301 (AISI 304) (standard PN 0) / 1.4541 (AISI 321) (standard PN 2,5) |
|  | 1.4404 (AISI 316 L), 1.4571 (AISI 316 Ti), RSt 37-2, H II or other materials on demand |
| Sightglass disc: | Sodium silicate glass to DIN 8902 (standard) |
|  | Borosilicate glass to DIN 7080 on demand |
| Gaskets: | KLINGERsil C4400, PTFE, Perbunan, Silicon, Viton, Gylon or other materials on demand |
| Screws / studs | A2-70 (standard) |
| and nuts: | A4-70 or 5.6 zinked on demand |

## Possible combinations:

The sightglasses can be combined with our centrally operated window wipers of the series W / WD / WDT, with the spraying devices of the series SVS (only version for PN 2,5) as well as with our sightglass light fittings of the series CHEMLUX ${ }^{\circledR}$, EdelLUX ${ }^{\circledR}$, miniLUX ${ }^{\circledR}$ or fibroLUX ${ }^{\circledR}$ for use in hazardous or safe areas. In these cases, the cover flanges are drilled and tapped to suit the respective light fitting fixation.

## Special versions:

- Special high vacuum-tight version with additional O-ring seal
- Glass disc in quartz and special gaskets for very high operating temperatures

## Contents of delivery:

The complete delivery consists of base and cover flanges, glass disc, gaskets for product and cover side and hexagonal socket head screws (version for PN 0) resp. studs and nuts (version for PN 2,5).

## Certificates:

On request against extra charge, to DIN 50049, 3.1(B), alternatively 3.1A for the flanges, 2.2 or 3.1 for the glass discs.

## MAX Mت̈டடER AG

Your reliable and efficient partner in sightglasses. Perfect, thoroughly engineered solutions from one hand! Always an interesting, technically advanced idea ahead!

| 200 | 225 | 250 | 15 | 252 | 300 | 275 | 16 | 24 | $8 \times \mathrm{M} 12$ |

## Mounting:

After having correctly welded the base flange onto or into the vessel wall, the product side gasket, the glass disc, the cover side gasket and the cover flange are mounted one after the other and then the socket head screws tightened against the cover flange (version for PN 0) resp. the nuts against the studs (version for PN 2,5).
Attention: The base flange has to be welded into or onto the vessel wall without any distortion to ensure a plain and flat sealing surface to avoid the breakage of the glass disc. If necessary, rework the sealing surface after welding. The screws have to be tightened evenly and crosswise.

Branch office / exclusive agent:

## VETRO

Complete assembly of sightglass fitting to DIN 28120, DN 100, PN 10, with glass disc of borosilicate to DIN 7080.

Complete assembly of sightglass fitting to DIN 28120, DN 125, PN 10, with glass disc of toughened sodium silicate to DIN 8902, fitted with CHEMLUX® ${ }^{\circledR}$ sightglass light fitting, type L 20 deH Sch, tilting hinge fixation

# Circular sightglass fittings to DIN 28120 or similar <br> Circular sightglass fittings to DIN 28121 Illuminated sightglass units VETROLUX ${ }^{\circledR}$ 

In addition to the well known programme of sightglass light fittings, MAX MÜLLER AG supplies complete sightglass fittings to or similar to DIN 28120 and to DIN 28121. These form, together with the reliable light fittings of the series CHEMLUX ${ }^{\circledR}$, EdelLUX ${ }^{\circledR}$, fibroLUX ${ }^{\circledR}$, miniLUX ${ }^{\circledR}$ or metaLUX ${ }^{\circledR}$, complete illuminated sightglass units VETROLUX ${ }^{\circledR}$ where both components are thoroughly determined and correctly chosen. The units are supplied as premounted sets, offering the following advantages:

- Only one supplier
- Responsibility from one hand
- Components mutually adapted, avoiding therefore mounting problems or eventual expensive adjustments.

With MAX MÜLLER AG, you have chosen the right and efficient partner, offering excellent service and high quality to very interesting prices. Ask the experts of MAX MÜLLER AG for advice and integrate VETROLUX ${ }^{\circledR}$ units into your installations. Remember: Our product range has a background of more than 40 year's experience and development. Both you and your customers will benefit from this know-how.

## Application:

In all cases where chemical or physical processes, reactions or e.g. fluid levels have to be observed, controlled or read off at the interior of stirred tanks, dryers, columns, silos, centrifuges, mixers, reactors, evaporators, separators, pipelines, pressure vessels or other closed containers.

Nominal diameters:
$\begin{array}{ll}\text { PN 10, 16: } & \text { DN 50-200 (DIN 28120) } \\ \text { PN 6: } & \text { DN 50-200 (similar to DIN 28120) } \\ \text { PN 10, 25: } & \text { DN 40-200 (DIN 28121) }\end{array}$
Operating conditions:
Max. pressure:DIN 28120: 10, 16, (6) bar DIN 28121: 10, 25 bar Higher pressures on demand
Vacuum

## Possible combinations:

Sightglass fittings to DIN 28120 or to DIN 28121 may be combined with our sightglass light fittings of the series CHEMLUX ${ }^{\circledR}$, EdelLUX ${ }^{\circledR}$, fibroLUX ${ }^{\circledR}$, miniLUX ${ }^{\circledR}$ or metaLUX ${ }^{\circledR}$ for use in hazardous or in safe areas. The cover flanges are drilled and tapped to be fitted with the respective light fitting in case of ordering the complete VETROLUX ${ }^{\circledR}$ unit.
Sightglass fittings to DIN 28120 or similar may further be equipped with window wipers of the series W, WD or WS (attention to the pressure limits!) as well as with spraying devices of the series SV / SVS for the occasional or continuous cleaning of the sightglass disc. (See separate leaflets).

## Certificates:

To be supplied against extra charge to DIN EN 10204.

Your reliable and efficient partner in sightglasses. Perfect, thoroughly engineered solutions from one hand! Always an interesting, technically advanced idea ahead!

## VETRO mulux

Circular sightglass fittings similar to DIN28120(PN6)
Dimensions
Assembly and construction materials Mounting

Our circular sightglass fittings to be welded into or onto vessel walls correspond in their construction and assembly to the dimensions and constructional guidelines of the DIN specification 28120. The respect of the DIN prescriptions for the flange thicknesses guarantees a distortion free location of the sightglass disc. The pressure resistance of the sightglass disc is, of course, dependent on the care with which the bolts and nuts are tightenend (always working on diametrically opposed pairs). For lubricated bolts, $\mu=0.1$, the recommended tightening torque values (in Nm ) are indicated in the table below. The maximum operating temperature is limited to $150{ }^{\circ} \mathrm{C}$ when using sighglass discs of sodium silicate to DIN 8902 and to $280^{\circ} \mathrm{C}$ when using sightglass discs of borosilicate to DIN 7080 . This temperature is also function of the quality of the used gaskets. For operating temperatures lower than $-10^{\circ} \mathrm{C}$, please consult the descriptive sheet AD 2000 W 10.

| (6) | Nuts <br> Bolts or studs | $5.6 / 5.2$ | A2 / A4 |

* Other materials not mentioned in the above table may also be delivered.

## Mounting:

After having correctly welded the base flange (1) onto or into the vessel wall, the gasket ${ }^{(2)}$, the glass disc © ${ }^{(4)}$, the gasket (3) and the cover flange (5) are mounted one after the other and then the nuts © (in case of studded base flange (1) progressively crosswise tightened against the studs $\mathcal{D}$. The above indicated tightening torque values have to be strictly respected. Additional information may be taken from the DIN specification 28120.

## Dimensions <br> Assembly and construction materials Mounting

Our circular sightglass fittings to be mounted directly onto a welding flange, pad or similar correspond in their construction and assembly to the dimensions and constructional guidelines of the DIN specification 28121. The sightglass fittings are completely premounted at manufacturer's works to form an integral, sealed, finished unit. The maximum operating temperature is limited to $200^{\circ} \mathrm{C}$. For higher operating temperatures, versions similar to DIN 28121 can be delivered on request, these with other seal and/or glass qualities.
The units may be used until -1 bar. For operating temperatures lower than $-10^{\circ} \mathrm{C}$, please consult the descriptive sheet AD 2000 W 10.

# Screwed dairy sightglasses similar to DIN 11851 Series SSA 

Screwed sightglass, DN 100, PN 6, type SSA 100

| Type | DN | a | A | d | D |
| :--- | ---: | ---: | ---: | ---: | ---: |
| SSA 50 | 50 | 18 | 46 | 55 | 92 |
| SSA 65 | 65 | 22 | 49 | 72 | 112 |
| SSA 80 | 80 | 23 | 54 | 87 | 127 |
| SSA 100 | 100 | 32 | 65 | 106 | 148 |
| SSA 125 | 125 | 20 | 60 | 132 | 178 |
| SSA 150 | 150 | 15 | 62 | 157 | 210 |

[^2]
## Application:

Screwed dairy sightglasses of the series SSA are used for the visual control of processes inside vessels, storage tanks, mixers, reactors etc. They are preferably used in pharmaceutical, cosmetics and food processing industries (milk industry, breweries, pharmaceutical plants etc).
They may be sterilised due to the high operating temperatures admitted.

## Construction and standard materials:

Our delivery normally contains (standard version):
(1) Welding flange
AISI 316 L (1.4404)
(2) Grooved collar nut
(3) Glass disc
AISI 304 (1.4301) or AISI 304 L (1.4307)
Sodium silicate to DIN 8902 (max. $150^{\circ} \mathrm{C}$ )
or
Borosilicate to DIN 7080 (max. $280^{\circ} \mathrm{C}$ )
(4) Gasket PTFE
(5) Gasket product side Silicone

## Special versions (On demand):

Special steel qualities for (1) and (2)
EPDM, PTFE or Viton for (5)
Aseptic design
Gasket product side with certificate FDA
Welding flange with thick wall to old DIN standards
Conditions of service:

Pressure:
Vacuum
Temperature: Depending on gasket quality
Special conditions: On demand
The above indications are only valid for sightglasses without wipers of the series W / WD!

## Certificates:

To be supplied against extra charge to DIN EN 10204.

## Possible combinations with light fittings:

## From DN 50:

From DN 65:

From DN 80:
With light fittings EdelLUX ${ }^{\circledR}$, series EdelEx
With light fittings miniLUX ${ }^{\circledR}$, series KVL/KVLR/BKVLR With fibre optic light fittings fibroLUX ${ }^{\circledR}$
With light fittings metaLUX®, series HLM / HLMR
With light fittings CHEMLUX ${ }^{\circledR}$, series $\mathrm{F}(\mathrm{L}) \mathrm{KEL} /$ (L)KEL / KL

With light fittings miniLUX ${ }^{\circledR}$, series KLR

With light fittings CHEMLUX ${ }^{\circledR}$, series PEL / PL
From DN 65 on, metaLUX ${ }^{\circledR}$ light fittings of the series HLM may be mounted together with wipers of the series W/WD. (See separate data sheet)
In case of order of combined units, the necessary adaptation of the grooved collar nut is made in our works.

Do you wish for more information about our wide range of light fittings for use in hazardous and safe areas, about our range of circular sightglasses to DIN 28120/28121, screwed sightglasses similar to DIN 11851, rectangular or D-ended sightglasses, pipeline flow indicators, centrally or sideways operated wipers, hinged sightglasses, spraying devices or our complete sight and lightglass units VETROLUX®? Are you interested in other types, special versions or different protection degrees? If yes, please contact us, our branch office or our local agents - it is our business! You will find the necessary indications about our sales network on the Internet.

## VETRO

## Double glazed sightglasses similar to DIN 28120, with or without heating element

Double glazed sightglass similar to DIN 28120, DN 150, PN 16, with integrated heating element, $24 \mathrm{~V}, 50 \mathrm{~W}$

For use with nominal pressures of PN 6 / PN 10 / PN 16

## Application:

For cases where undesired condensation and product deposits on the inner side of the glass discs have to be avoided.
The sightglasses contain two independent glass discs built into an intermediate ring. The heating element is built into the intermediate ring. The sightglasses are delivered to be welded into or onto a vessel wall. Dimensions to DIN 28120, except the height.

## Maximum allowed temperatures:

$280^{\circ} \mathrm{C}$ with glass discs in borosilicate to DIN 7080
$150^{\circ} \mathrm{C}$ with glass discs in sodium silicate to DIN 8902
Above indicated temperatures may change depending on the quality of the gaskets.

## Nominal diameters:

DN 50 - DN 200 (free view from 80 mm to 225 mm )

## Materials:

Base flange: Boilerplate, stainless steels, Titanium, Hastelloy etc.
Gaskets:
Sightglass discs: PTFE etc
Sodium silicate to DIN 8902
Borosilicate to DIN 7080
Intermediate ring: Boilerplate, stainless steels, Titanium, Hastelloy etc.

Cover flange:
Tightening bolts: Boilerplate, stainless steels, Titanium, Hastelloy etc. 8.8, A2, A4

Electrical data:
Supply voltage:
Nominal rating:

24 V (AC or DC)
50 / 75 / 100 W (not regulated)

## Further applications:

- Spoiling with cooling liquids e.g. to prevent non allowed elevated glass temperatures
- Leak control, e.g. by spoiling with inert gases and concentration monitoring or measuring pressure differences

## Options:

- Also available without heating element
- Security version

## Possible combinations:

Above sightglasses may be combined with our sightglass light fittings of the series $\mathrm{CHEMLUX}^{\circledR}$, EdelLUX ${ }^{\circledR}$, fibroLUX ${ }^{\circledR}$, miniLUX ${ }^{\circledR}$ or metaLUX ${ }^{\circledR}$. With integrated heating element, the use is restricted to safe area applications.

## Certificates:

To be supplied against extra charge to DIN EN 10204.

## MAX Mت̈LடER AG

Your reliable and efficient partner in sightglasses. Perfect, thoroughly engineered solutions from one hand! Always an interesting, technically advanced idea ahead!

| 200 | 6 | 225 | 250 | 25 | 340 | 295 | 20 | 36 | 100 | 8 | M20 |  |
|  | 10 |  |  | 30 |  |  | 35 |  | 125 |  |  | 63 |

| Assembly and construction |  |
| :--- | :--- |
| 1 | Bolts or studs |
| 2 | Nuts |
| 3 | Cover flange |
| 4 | Gaskets |
| 5 | Glass discs |
| 6 | Heating element |
| 7 | Intermediate ring |
| 8 | Base flange |

## Mounting:

After having correctly welded the base flange (8) onto or into the vessel wall, the gaskets (4), the glass discs (5), the intermediate ring (7) as well as the cover flange (3) are positioned one after the other and then the nuts (2) progressively tightened against the bolts or nuts (1). The above indicated tightening torque values (in Nm) have to be strictly respected. The nuts have to be tightened over cross. Additional information may be taken from the DIN specification 28120. The heating element (6) (50, 75 or 100 W ) has to be screwed into the intermediate ring $\mathcal{7}$ and to be connected via a temperature regulation device to 24 V AC or DC supply.

## VETRO mulux

Double glazed safety sightglass similar to DIN 28121, DN 125, PN 10

# Double glazed security sightglasses similar to DIN 28121 

For use with nominal pressure of PN 10 (higher pressures on demand)

## Application:

For cases where the possible destruction of a single sightglass would present a considerable safety risk.
The sightglasses contain two independent glass discs built into an intermediate support ring. The damage of one disc doesn't affect the guaranteed security of the unit.
The preassembled units are to be screwed onto existing pre-welded, base or other flanges.
Dimensions to DIN 28121, except the height.

## Maximum allowed temperatures:

$280^{\circ} \mathrm{C}$ with glass discs in borosilicate to DIN 7080
$150^{\circ} \mathrm{C}$ with glass discs in sodium silicate to DIN 8902
The above indicated temperatures may change depending on the quality of the gaskets

## Nominal diameters:

DN 50 - DN 200 (free view from 65 mm to 175 mm )
Construction and materials:

| Pos.: | Part: | Material: |
| :--- | :--- | :--- |
| 1 | Base flange | Boilerplate, stainless steels, Titanium, Hastelloyetc. |
| $2.1 / 2.2$ | Gaskets | KLINGERsil C 4400, Silicone, PTFE etc. |
| 3 | Sightglass <br> discs | Sodium silicate to DIN 8902 <br> Borosilicate to DIN 7080 |
| 4 | Intermediate <br> support ring | Boilerplate, stainless steels, Titanium, Hastelloy <br> etc. |
| 5 | Cover flange | Boilerplate, stainless steels, Titanium, Hastelloyetc. |
| 6 | Tightening bolts | 8.8, A2, A4 |

## Option:

Also available as heated version to prevent condensation or deposits on the glass discs.
Electrical data:
Supply voltage: $\quad 24 \mathrm{~V}$ (AC or DC)
Nominal rating: $\quad 50$ / 75 / 100 W (not regulated)
Further applications:

- Spoiling with cooling liquids e.g. to prevent non allowed elevated glass temperatures
- Leak control, e.g. by spoiling with inert gases and concentration monitoring or measuring pressure differences

## Possible combinations:

Above sightglasses may be combined with our sightglass light fittings of the series $\mathrm{CHEMLUX}^{\circledR}$, EdelLUX ${ }^{\circledR}$, fibroLUX ${ }^{\circledR}$, miniLUX ${ }^{\circledR}$ or metaLUX ${ }^{\circledR}$. With integrated heating element, the use is restricted to safe area applications.

## Certificates:

To be supplied against extra charge to DIN EN 10204.

## MAX Mت̈LLER AG

Your reliable and efficient partner in sightglasses. Perfect, thoroughly engineered solutions from one hand! Always an interesting, technically advanced idea ahead!

* The dimension d 4 (not shown) is the dimension $\mathrm{d} 3+2 \mathrm{~mm}$ each. The dimension d 4 is the outside diameter of the inner gaskets.
** Not contained in our delivery

## Mounting:

By using the fixation bolts of which the number and size are indicated in the above table, the complete, premounted, tightened and sealed unit is fixed onto a welding flange, pad or similar. The heating element (optional) has to be connected via a temperature regulation device to 24 V AC or DC.

## VETRO

D-ended, elongated sightglass type LSGRR 316 Ti304 -2,5-2-SL-8903-KLINGERsil-Silicone. Version with blind tappings, base and cover flange in stainless steel, PN 2,5, glass plate to DIN 8903, seals KLINGERsil C4400 / silicone, dimensions $341 \times 116 \mathrm{~mm}$.

Standard versions

## D-ended, elongated sightglasses Series LSG / LSGR / LSGRR

## Application:

Elongated sightglasses VETROLUX® of the series LSG / LSGR / LSGRR may be used to observe the interior of reactors, columns, silos, vessels, storage tanks, pipelines or as liquid level indicators. They are delivered ready to be welded into or onto a vessel wall, complete with appropriate seals, glass plate and cover bolts. The D-end shape facilitates easier machining of the vessel wall prior to welding in the unit.
Operating conditions:
Nominal pressure 2,5 / 6 / 10 / 25 bar (see table overleaf)
Vacuum
Note: The nominal pressure indicated refers to the design base of the sightglass. When welded into the vessel concerned, the base frame becomes part of the vessel wall. It is necessary, therefore, that appropriate strength calculations are made on all vessels concerned with respect to the design pressure and size of the vessel and in accordance with the relevant design code. If found to be necessary, reinforcement of the vessel wall has to be carried out. Operating temperatures:
$100^{\circ} \mathrm{C}$ max. with sodium silicate glass to DIN 8903
$243^{\circ} \mathrm{C}$ max. with borosilicate glass to DIN 7081
Note: The above indicated temperatures refer to the use of unprotected glass plates, with no protective mica sheets.
Standard materials:
Base flange: $\quad$ Boiler plate RSt 37-2 / HII / AISI 316 Ti / AISI 316 L
Cover flange:
Glass plates:
(Transparent)
Seals:

Cover bolts Boiler plate RSt 37-2 / HII / AISI 304 / AISI 316 Ti / AISI 316 L Sodium silicate to DIN 8903
Borosilicate to DIN 7081
KLINGERsil C4400
EPDM
Silicone
PTFE
Carbon steel, zinked, quality 8.8
Stainless steel A2-70
to DIN 912:

Other materials on request.

## Certificates:

To be supplied against extra charge to DIN EN 10204.
Standard versions: (see left)

- Base flange with bolt tappings drilled through (dimensions see table overleaf), type designation - DB
- Base flange with blind tappings, type designation - SL
- Base flange with radiused back (to correspond to vessel radius), type designation - R

Options:

- Version with double glasses (not available for PN 25).
- Fluted glass plate for liquid level indication (only available for PN 25).
- Special dimensions.
- Closed back (base flange) version with drilled and tapped holes at the ends for pipe connections so that the unit may be used as an external gauge of a liquid level.

## Type designation:

- Series LSG:

Base and cover flange in boiler plate RSt 37-2

- Series LSGR

Base flange in stainless steel
Cover flange in boiler plate RSt 37-2

- Series LSGRR: Base and cover flange in stainless steel

## Ordering example:

For an elongated, D-ended sightglass of nominal pressure 10 with base and cover flange in AISI 316 / AISI 304 and the base flange in version b) with blind tappings together with a glass plate of sodium silicate to DIN 8903 and overall dimensions of $350 \times 80 \mathrm{~mm}$, seals PTFE base side, KLINGERsil C4400 cover side, cover bolts A2-70, the correct designation would be:
1 piece type LSGRR 10-3, 1.4571 / SL - PTFE - 8903-C4400-1.4301-A2.

## MAX MÖLLER AG

## VETRO <br> UX

## Rectangular sightglass fittings TÜV-approved Series RSG / RSGR / RSGRR Sizes 170-1000

Rectangular sightglass fitting, series RSGRR, size 250 , with reflex glass

## Application:

Rectangular VETROLUX® sightglasses of the series RSG / RSGR / RSGRR may be used to observe the interior of reactors, columns, silos, vessels, storage tanks and pipelines. They serve mainly as liquid level gauges. The are delivered ready to be welded into or onto a vessel wall, complete with the appropriate seals, glass plates, and cover fastenings.
Operating conditions:
Nominal pressure 16 bar

## Vacuum

Note: The nominal pressure indicated refers to the design base of the sightglass. When welded into the vessel concerned, the base frame becomes part of the vessel wall. It is necessary, therefore, that appropriate strength calculations are made on all vessels concerned with respect to the design pressure and size of the vessel and in accordance with the relevant design code. If found to be necessary, reinforcement of the vessel wall has to be carried out.
Operating temperatures:
$100^{\circ} \mathrm{C}$ max. with sodium silicate glass to DIN 8903
$243^{\circ} \mathrm{C}$ max. with borosilicate glass to DIN 7081
Note: The above indicated temperatures refer to the use of unprotected glass plates, with no protective mica sheets.

## Standard materials:

Base frame:
Cover frame:
Glass plate:
Gaskets:
Cover fastenings:
Steel, quality 8.8 / Stainless steel
Other materials on request.

## Certificates:

To be supplied against extra charge to DIN EN 10204.

## Options:

- Version with closed base frame (drawing left) to be used as an external liquid level gauge with top and bottom pipe connections. For this application, the base frame will be supplied appropriately drilled and tapped
- Radiused base frame to suit vessel wall
- Clear (transparent) glass plate
- Alternative versions in shape and size

## Remarks:

The TÜV approval does not apply to the base flange as this is considered as part of the vessel wall after welding. Standard delivery includes a reflex (fluted) glass plate. In circumstances where a clear (transparent) glass plate is required, this must be clearly stated at the time of enquiry.
After welding into the vessel, the base frame should be checked to ensure that the sealing surface is flat and has not become distorted to avoid possible leakage under pressure and / or breakage of the glass plate during tightening of the cover frame bolts. This process should be carried out in several steps and progressively alternating between each pair of opposite bolts from one end of the frame to the other! Tighten first little, then repeat the operation.

## Type designation:

- Series RSG:
- Series RSGR:
- Series RSGRR:
Base and cover frame in steel RSt 37-2
Base frame in AISI 316 Ti and cover frame in RSt 37-2
Base and cover frame in AISI 316 Ti

## Ordering example:

1 piece rectangular sightglass, base frame in AISI 316 Ti, cover frame in RSt 372, length 350 mm , glass plate in sodium silicate glass to DIN 8903, fluted (Reflex), gasket product side PTFE, cover side Neoprene, cover fastenings 8.8 zinked:
1 piece type RSGR-350, 1.4571-PTFE - 8903 R - Neoprene - RSt 37-2-8.8 zink.

Your reliable and efficient partner in sightglasses. Perfect, thoroughly engineered solutions from one hand! Always an interesting, technically advanced idea ahead!

## VETRO <br>  MMlux

Survey of standard types Dimensions

| Depending on the overall length of the sightglass, the coverframes length $A$, and the base frame interrupted by bridges which correspond to this length. This strengthens the base frame and reduces the maximum length of the individual glass pieces required to cover the whole length, thus reducing the possibility of glass breakages when the cover frames are tightened down. When selecting the overall length of the sightglass, and the number of units this will involve, due note should be taken to ensure that the liquid level to be observed normally falls intoone of the visible sections. (If this is not possible, then consult us for our series of D-ended sightglasses |  | * 36 for size 600 |  |

## VETRO ( ${ }^{\text {B }}$ MMIUX

## Hinged sightglasses with or without illumination series KSGB / KSG

Hinged illuminated sightglass type KSGB 125 Terminal voltage of built-on light fitting 24 V , nominal rating 50 or 100 watts. Built-in wiper, series W.

Typical assembly of a hinged illuminated sightglass series KSGB.

The hinged sightglasses of the series KSG / KSGB represent the combination of an illuminated / non illuminated sightglass with a mechanism for quick and easy opening and closing of the combined unit.

Application: Mainly where a chemical or physical process needs a quick addition of components (e.g. of a powder or a liquid) or where samples of the vessel contents have to be taken regularly or sporadically for control purposes. The application of the standard version of the illuminated units is restricted to safe area use.

## Conditions of service:

Maximum pressure inside Type KSG(B) 125: 1.0 bar
the vessel:
Type KSG(B) 200: 0.5 bar
Vacuum
Maximum temperatures: $\quad 200^{\circ} \mathrm{C}$ with glass disc of borosilicate (DIN 7080) $150^{\circ} \mathrm{C}$ with glass disc of sodium silicate (DIN 8902) Higher temperatures on demand. With mounted metaLUX light fitting with push-button, the temperature inside the connection box should not exceed $100^{\circ} \mathrm{C}$.

## ATTENTION:

## Never open under pressure!

Electrical caracteristics: (For type KSGB with mounted light fitting)
Supply:
Terminal voltage:
Nominal rating:
Bulbs:
Transformers in protection modes IP 00 or IP 65 for different primary voltages may be supplied on demand.

Enclosure protection degree: IP 65, dust and water jet tight to EN 60529 / DIN VDE 0470 part 1.

Mounting: The unit is supplied completely premounted. Before welding of the flange, the light fitting with the hinge mechanism have to be separated from it.

## Assembly:

The picture left shows the typical construction elements:
A) Light fitting metaLUX, series HL
B) Light fitting holder
C) Welding flange
D) Closing bolt with grip head
E) Closing head
F) Tilting hinge
G) Cover of the metaLUX light fitting

## Options:

- Wiper series W / WD (see separate data sheet)
- Delivery without light fitting. (Correct type designation is then KSG).
- Light fitting for use in hazardous areas
- Pieces in contact with the medium in stainless steel

Replacement of the bulb: The bulb may be changed under pression or vacuum after opening of the cover G): After loosening of its socket, the bulb can be replaced.

Attention: Do only touch with a proper cloth!

## Type WDT

## Wipers

for sightglass discs Series W / WD / WDT / WR / WDR

## Application:

Wipers of the series W / WD / WDT / WR / WDR are built into sightglasses similar to DIN 28120 or DIN 11851 to prevent cristallisation of the media inside the vessel onto the inner side of the glass disc or to hold the sightglass free of dust and / or dirt.
The wipers are mounted into glass discs with a centric hole of a diameter of $10,5 \mathrm{~mm}$.
Materials (standard):

Wiper-blade: Mechanical parts:
Glass discs:

## PTFE, silicone rubber, silicone rubber FDA Stainless steel <br> Sodium silicate similar to DIN 8902 or <br> Borosilicate similar to DIN 7080 <br> Macrolon on request (only for pressureless operation at ambient temperature)

## Operating conditions:

1. Maximum pressure inside the vessel: 2 to 6 bar, depending of the glass diameter (see table overleaf). For higher pressures, please consult us.
2. Vacuum
3. Maximum temperatures: $180^{\circ} \mathrm{C}$ with wiper-blade of silicone rubber $200^{\circ} \mathrm{C}$ with wiper-blade of PTFE
Possible combinations (only for wipers fo the series W/WD):
Sightglasses to or similar to DIN 28120:

## VETRO

Wiper system WS, built into a VETROLUX ${ }^{\circledR}$ sightglass to DIN 28120, DN 100, PN 10

Wiper system WS, built into a VETROLUX ${ }^{\circledR}$ sightglass to DIN 28120, DN 100, PN 10, with mounted sightglass light fitting miniLUX ${ }^{\circledR}$, type KVL 50 HDSch, $24 \mathrm{~V}, 50 \mathrm{~W}$, for combined "view and light through one assembly".

## Wipers <br> Series WS with sideways operated flexible shaft driven wiper blade for circular sightglasses to DIN 28120 or similar

## Introduction:

Besides the well known wipers of the series W/WD which are - due to their construction principle - limited in their application since they withstand only weak pressure and/or vacuum, the wiper system WS permits to cover a wide spectrum of higher pressure and/or vacuum applications.

## Application:

Wipers of the series WS are used for the cleaning of the inner side of sightglasses built into pressure or vacuum vessels. They may be operated in hazardous as well as in safe areas. They fit by means of pressure and vacuum tight glands through the lower and cover flange of circular sightglass units to DIN 28120 or similar of DN 100 to 200.

## Operating conditions:

a) Maximum pressure: 16 bar
b) Vacuum
c) Maximum operating temperatures:
$180^{\circ} \mathrm{C}$ withglassdisScto DIN7080 (borosilicate) and wiperbladeinsilicone $200^{\circ} \mathrm{C}$ with glass disc to DIN 7080 (borosilicate) and wiper blade in PTFE $150^{\circ} \mathrm{C}$ with glass disc to DIN 8902 (sodium silicate)

## Materials:

Wiper mechanism: Stainless steel for all parts in contact with the product Wiper blade: PTFE or silicone
Sealings: PTFE (admitted for use in food processing industries)

## Possible combinations:

The wiper system WS may be combined with a spraying device of the series SV/SVS as well as with the light fittings of the series CHEMLUX ${ }^{\circledR}$, EdeILUX ${ }^{\circledR}$, fibroLUX ${ }^{\circledR}$, miniLUX ${ }^{\circledR}$ or metaLUX ${ }^{\circledR}$ for use in hazardous or safe areas. The light fittings may be mounted in the versions "light and view through one sightglass assembly" as well as for separate sightglasses.

## Delivery:

As a complete set with detailed mounting instructions to be built into existing sightglasses or supplied together with a complete sightglass VETROLUX ${ }^{\circledR}$ to your specifications. In the second case, MAX MÜLLER AG carries out the necessary machining of the welding and the cover flange of the sightglass.

MAX Mت̈LடER AG
Your reliable and efficient partner in sightglasses. Perfect, thoroughly engineered solutions from one hand! Always an interesting, technically advanced idea ahead!

## VETRO

## Assembly Mounting Dimensions

Assembly drawing of the wiper system WS

The general assembly of the wiper system WS may be seen from the left drawing:
The operating lever A with free-wheel return drives the wiper blade holder $D$ in an uni-directional sense by means of a flexible shaft guided in the distance tube C . The tightness against pressure or vacuum is created by the gland sealings $B$.
If the wiper system WS is mounted into an existing sightglass, we are supplying detailed and illustrated mounting instructions with the set. If the system is ordered with a VETROLUX ${ }^{\circledR}$ sightglass, the necessary adaptations are carried out in our works.
For a correct delivery of the complete sightglass, we need the following order specifications:

1. Nominal diameter (DN)
2. Nominal pressure (PN)
3. Materials for: $\quad$ a) Welding flange (e.g. $316 \mathrm{Ti} \triangleq 1.4571$ )
b) Cover flange (e.g. carbon steel)
c) Studs and nuts
d) Sealings product side and cover side
e) Glass disc (DIN 7080, borosilicate or DIN 8902, sodium silicate)
f) Wiper blade (PTFE or silicone)

Branch office / exclusive agent:

[^3]Do you wish for more information about our wide range of light fittings for use in hazardous and safe areas, about our range of circular sightglasses to DIN 28120/28121, screwed sightglasses similar to DIN 11851, rectangular or D-ended sightglasses, pipeline flow indicators, centrally or sideways operated wipers, hinged sightglasses, spraying devices or our complete sight and lightglass units VETROLUX®? You will find the necessary indications about our sales network on the Internet.

## VETRO

Spraying unit, type SV 4, built into circular sightglass similar to DIN 28120, DN 125, PN 6.

Spraying unit, built into circular sightglass to DIN 28120.

## Branch office / exclusive agent:

## Spraying units for circular sightglasses to DIN 28120 or similar Series SV

## Application:

VETROLUX ${ }^{\circledR}$ spraying units of the series SV may be used for cleaning the inner face of sightglass discs via an intermittent, continuous or automatically controlled spray. They are suitable in either safe or hazardous areas for all standard sightglasses and may be used both for pressure and vacuum vessels subject to test certification.

## Mounting:

The mounting is made by means of a connection piece screwed into the welding flange to form a pressure tight seal and through a clearance hole in the cover flange.

## Operating conditions:

These correspond to those of the sightglass used and it's rating.

## Materials:

Contact parts: Stainless steel
Gaskets: PTFE

## Possible combinations:

The spraying units may be used in conjunction with VETROLUX ${ }^{\circledR}$ wipers of the series W / WD or WS together with the lightfittings of the series CHEMLUX® ${ }^{\circledR}$, EdeILUX ${ }^{\circledR}$, fibroLUX ${ }^{\circledR}$, miniLUX ${ }^{\circledR}$ or metaLUX ${ }^{\circledR}$ without any restriction.

## Delivery contents:

The complete set consists of a connecting angle piece, a distance tube and the spraying jet head (see drawing left).

## Connection:

The connection is made via a hole drilled into the welding flange, $\mathrm{G}^{1 / 4} 4^{\prime \prime}$. A clearance hole of $\varnothing 25 \mathrm{~mm}$ in the cover flange is also required.

## Remarks:

- Dependent on operating conditions, a suitable non-return valve should be built into the feed tube.
- When the spraying units are ordered complete with sightglasses, all the necessary fitting requirements will be carried out at our works, as part of the delivery.

| Type | SV 1 | SV 2 | SV 3 | SV 4 | SV 5 | SV 6 |
| :--- | ---: | ---: | ---: | ---: | ---: | ---: |
| Nominal diameter (DN) <br> to DIN 28120 | 50 | 80 | 100 | 125 | 150 | 200 |
| Pitch circle TK for connection <br> drillings (mm) | 132 | 160 | 186 | 210 | 240 | 295 |

## Ordering example:

A spraying unit for mounting into a sightglass to DIN 28120, DN 150: 1 piece SV 5.

## Important:

When the spraying unit is to be ordered together with a sightglass unit, we need the following information at the point of order:

1) Nominal diameter (DN), 2) nominal pressure (PN) of the sightglass, 3) materials for the welding and the cover flanges, 4) materials for the product and cover side gaskets, 5) quality of the glass disc (borosilicate / sodium silicate) and 6) material for the studs and nuts.

PROCESS ILLUMINATION AND VISUAL OBSERVATION SYSTEMS

## VETRO

Spraying unit of the series SVS

Spraying unit of the series SVS built into circular sightglass to DIN 28120

## Branch office / exclusive agent:

## Spraying units for circular sightglasses to DIN 28120 or similar Series SVS

## Application:

VETROLUX ${ }^{\circledR}$ spraying units of the series SVS may be used for cleaning the inner face of sightglass discs via an intermittent, continuous or automatically controlled spray. They are suitable in either safe or hazardous areas for all standard sightglasses and may be used both for pressure and vacuum vessels subject to test certification. According to your needs, we recommend the mounting of several units into the same sightglass.

## Mounting:

The mounting is made by means of a connection piece screwed into the welding flange to form a pressure tight seal and through a clearance hole in the cover flange.

## Operating conditions:

These correspond to those of the sightglass used and it's rating.
Materials:
Contact parts: Stainless steel
Gaskets: PTFE

## Possible combinations:

The spraying units may be used in conjunction with VETROLUX ${ }^{\circledR}$ wipers of the series W / WD or WS together with the lightfittings of the series CHEMLUX®, EdelLUX ${ }^{\circledR}$, fibroLUX ${ }^{\circledR}$, miniLUX ${ }^{\circledR}$ or metaLUX ${ }^{\circledR}$ without any restriction.

## Connection:

The connection is made via a hole drilled into the welding flange, M14 $\times 1,5$. A clearance hole of $\varnothing 21 \mathrm{~mm}$ in the cover flange is also required.

## Remarks:

- Dependent on operating conditions, a suitable non-return valve should be built into the feed tube.
- When the spraying units are ordered complete with sightglasses, all the necessary fitting requirements will be carried out at our works, as part of the delivery.

## Mounting and delivery contents:

The drawing left shows the elements of the delivery:
1 Connection piece
2 Gaskets
3 Counter nut
4 Spraying head

## Ordering example:

A spraying unit for mounting into a sightglass to DIN 28120, DN 125: 1 piece SVS.

## Important:

When the spraying unit is to be ordered together with a sightglass unit, we need the following information at the point of order:

1) Nominal diameter (DN), 2) nominal pressure (PN) of the sightglass, 3) materials for the welding and the cover flanges, 4) materials for the product and cover side gaskets, 5) quality of the glass disc (borosilicate / sodium silicate) and 6) material for the studs and nuts.

## VETRO

Sightglass discs to DIN 8902 or DIN 7080.

Sightglass discs similar to DIN 8902 or DIN 7080 with central bore hole $\varnothing 10,5 \mathrm{~mm}$ to fit our wipers of the series W/ WD.

| Branch office / exclusive agent: |
| :--- |
|  |
|  |
|  |

[^4]Sightglass discs to DIN 7080 Sightglass discs to DIN 8902 Sightglass discs similar to DIN 7080 / 8902 with central bore hole $\varnothing 10.5 \mathrm{~mm}$ for wipers of the series W/WD

## Application:

The sightglass discs are sized for mounting into the standard circular sightglasses to DIN 28120 / 218121 or similar and also for use in screwed sightglasses similar to DIN 11851. (So called "sanitary" or "dairy" version). The glass discs with central bore hole $\varnothing 10.5 \mathrm{~mm}$ have the same application as the above, but may be fitted with our centrally operated wipers of the series W / WD.

## Operating conditions:

Nominal pressure: See tables below
Temperatures: $\quad$ Maximum $150^{\circ} \mathrm{C}$ for sodium silicate glass to DIN 8902 Maximum $280^{\circ} \mathrm{C}$ for borosilicate glass to DIN 7080 No minimum temperature limit
The glass discs are toughened by thermal treatment. The seal and viewing areas are polished. The edges are ground smooth.

## Options:

- Individual pressure tests
- Special dimensions
- Double or compound glazing using discs of similar or different diameters as in table below from one piece
- Certificates to DIN EN 10204 may be supplied against extra charge

## VETRO <br> ( ${ }^{\text {® }}$ MMlux

Sight flow indicator, series FB-VA, type FB-VA 50

Sight flow indicator, series FB-VA, type FB-VA 100

Flow indicators for pipelines with flanged ends for bolting Series FF-VA / FB-VA in stainless steel Series F-St in carbon steel

## Application:

VETROLUX ${ }^{\circledR}$ sight flow indicators are used for the observation of a flow of liquid in tubes and pipelines. Visibility may be considerably enhanced by combination with our proven light fittings for hazardous and safe areas. (Please see our respective leaflets).
Operating conditions:

Nominal pressure:
PN 6 / 16:
Vacuum
Maximum temperature:

## Standard materials:

Body material:
(series FF-VA / FB-VA)
Loose connecting flanges,
PN 10, to DIN 2642:
(series FB-VA)
Body material and welded con-
necting flanges to DIN 2576, PN 10: Carbon steel RSt 37-2
(Series F-St)
Flanges, PN 10 (to DIN 2576): 1.4571 (= AISI 316 Ti)
(series FF-VA)
Cover flanges:

Bolts:

Glass discs:

Gaskets product side: cover side:

10 bar (PN 10)
On request (only for series F-St)
$280^{\circ} \mathrm{C}$
1.4435 (= AISI 316 L) / 1.4404 (= AISI 316 L)
(up to DN 100)
1.4571 (= AISI 316 Ti) (from DN 125)

Galvanised RSt 37-2

Galvanised RSt 37-2 / C 22.8 (FB-VA / F-St) Stainless steel (FF-VA)
Galvanised socket head screws to DIN 912, 8.8 (FB-VA / F-St)
A4-70 (FF-VA)
Borosilicate glass to DIN 7080 (Standard)
Sodium silicate glass to DIN 8902 (Option)
Graphite
KLINGERsil C4400

Other materials are available on request.

## Options:

- Security version with double glazing
- Version without "drop-nose" for hygienic applications
- With turbine
- With flap

## Remarks:

When enquiring or ordering please always state the nominal pressure (PN) required.

## Ordering example:

1 piece VETROLUX® sight flow indicator with flanged ends, body in stainless steel 1.4435 (= AISI 316 L ), nominal pressure 10 bar (PN 10), nominal diameter (DN) 80:
1 piece FF-VA 80-316 L-10-Graphite-KLINGERsil C4400

## VETRO

Metal fused Triclamp sanitary sightglass fitting, type "Standard View" (SV)

Metal fused Triclamp sanitary sightglass fitting, type "Large View" (LV)

Typical assembly
All dimensions in mm .
Subject to changes without preliminary notice

Metal
fused sightglasses for Triclamp fittings

## Applications:

For clamp fittings to DIN 32676 / ISO 2852

## Versions:

- Version with standard view, type "Standard View" (SV)
- Version with enlarged view, type "Large View" (LV)

## Advantages:

- Suitable for food processing and sterile applications
- High security
- Easy installation

## Technical data:

- Test base: DGRL 97 / 23 / EG, AD 2000 standards, DIN 7079-1 May 1999
- Materials to VdTÜV specifications and the respective DIN/EN standards

## Certificates:

To be supplied to DIN EN 10204-3.1 against extra charge

## Operating conditions:

- Pressure: -1 to 6 / 10 / 16 / 25 bar (see table)
- Temperatures:

$$
\begin{array}{lll}
\text { Ring materials: } & 1.4462: & -30^{\circ} \mathrm{C} \text { to }+280^{\circ} \mathrm{C}(\mathrm{SV}) /+150^{\circ} \mathrm{C}(\mathrm{LV}) \\
& 2.4602: & -60^{\circ} \mathrm{C} \text { to }+300^{\circ} \mathrm{C}(\mathrm{SV}) /+150^{\circ} \mathrm{C}(\mathrm{LV}) \\
& 2.4610: & -60^{\circ} \mathrm{C} \text { to }+300^{\circ} \mathrm{C} \text { (type SV only) }
\end{array}
$$

## Materials:

- Ring:
- Glass quality:
$1.4462,2.4602,2.4610$ (SV) / 1.4462, 2.4602 (LV)
Borosilicate to DIN 7080 (SV)
Sodium silicate to DIN 8901 (quality B270 Superwite) (LV)

## Dimensions:

## VETRO ® MMlux

Metal fused
sightglass flanges
for sterile applications

Sightglass flange DN 150

O-ring
AS 568 A / B.S. 1806

Typical assembly

## Application:

- For base flanges to DIN 28117 or similar
- For weldnecks with flat face

IMPORTANT: Only for use with parallel flat face flanges without seal recess. Maximum tightening torque 20 Nm . We therefore recommend the use of Belleville spring washers, 2 pcs. for each connection hole.

## Advantages:

- High security
- Flush glass / metal border on outer side for easy cleaning for sterile applications
- Maximum viewing area

## Approvals:

TÜV-Approval to the pressure vessel guideline as part of a pressure vessel (for material duplex stainless steel 1.4462)

## Technical data:

- Test base: DGRL 97 / 23 / EG, AD 2000 standards, DIN 7079-1 May 1999
- Materials to VdTÜV specifications and the respective DIN / EN standards
- Glass quality: Borosilicate glass to DIN 7080

## Certificates:

- To be supplied against extra charge to DIN EN 10204
- Pressure: -1 to 16 bar (see table)
- Temperatures:

Ring materials: $\quad 1.4462: \quad-30^{\circ} \mathrm{C}$ to $+280^{\circ} \mathrm{C}$
