KEOFITT BASIX SAMPLING VALVE

The KEOFITT BASIX Sampling Valve is our product category for process CIPable sampling valves for less demanding applications that require no separate inlet for sterilizing or sanitizing media.

This valve is designed for sampling of low or medium viscous liquids in the range of 0-100 cP with particles less than 1,5 mm in diameter. Sampling of more viscous liquids is possible, only will it take longer (depending on process pressure).

Basix™ is used for for simple, hygienic sampling in all industries for products such as:

- Water
- Unprocessed Milk
- Perfume
- Fruit Juice

The Basix comes as a complete valve with numerous different variations to choose from, including manual or pneumatic actuators.

Choose from silicone, EPDM or PTFE membranes.
